

REED HOOK

TEXSOLV HEDDLES FOR LECLERC LOOMS

Texsolv System heddles are made in joined 100-heddles bundle. The strong, durable polyester is crocheted without knots. Heddles do not stretch. Heddles slide easily on harnesses heddle support. Open construction of heddles facilitates threading and eliminates friction on warp. Heddles stay equal length. Eyes are always on the same level.

The heddles can be used connected or cut. (Use sharp scissors) Cutting is best when the heddles is hanging on the Shaft heddles supports
